Detail Review¹

Detail Review includes the analysis of each charge, the computation of all charges, and the comparative to reasonable and customary practice. This analysis exposes math errors, duplicate charges, chains of mark ups, excessive rates, application errors, formula pricing and documentation deficiencies.

Project Management²

This activity describes the implementation of the MBA Project Management Standard on the management of the project. In such cases, MBA writes the Scope, Critical Path, Project Specifications, Project Budget and manages the project on site.

Major math error/Detail³

This category describes projects where major errors have been made throughout the project and there was little or no accountability required of the contractor.
